Re: License and Regulations for Landfills
South Dayton Dump and Landfill
1975 Springboro Pike
Moraine

Dear Mr. Grillot:

We have been in personal contact with each landfill operator during the past few months and have advised each of the changes in the State law.

Since the State law is not in full effect until July 1, 1969, the Montgomery County Prosecutor and Legal Council of the Ohio Department of Health, have advised us to take the following action.

The Board of Health on November 3, 1968 repealed only Section 65.40, 65.50 and 65.55 of the Montgomery County Sanitary Regulations. Now all landfill operators, under the jurisdiction of the Montgomery County Health Department will need to apply only for the State license. This should be done through our office. However, both the standards as set forth in Regulation 65 and the State standards will be applicable and enforced.

All garbage and refuse must be compacted and covered daily, with a minimum of 6" of dirt. Additional covering requirements will be found in Regulation 65.

No burning will be allowed within a landfill site. The burning of clean wood, free of garbage and refuse will not be within the purview of this office unless a nuisance is created. On sites other than a landfill site, we would advise you first check with your local zoning office and fire department.

The State law requires a landfill plan to be submitted with your application. (Note page 34 - 35 of the enclosed "Interpretive Guide" from the Ohio Department of Health.) Since the deadline for submission of landfill applications is close, December 31, 1968, we are not at this time requiring extensive engineering plans. We do, however, expect your operation plan to be complete enough to outline your method of operation.

We suggest you read both of the enclosed regulations carefully. Please enclose your check for the State required \$500.00 with your application. Checks should be made payable to the Montgomery County Health Department. The State law requires you to have your license by January 1, 1969.

If you have any questions, please feel free to call us.

Sincerely yours,

Robert A. Vogel
ROBERT A. VOGEL, M.D.,
Health Commissioner

GROUND-WATER POLLUTION SOURCE INVENTORY

LANDFILL FACT SHEET

N 39° 43'34"
E 84° 13'17"

DESCRIPTION:

Entity Moraine Recycling Inc.
 Owner/Operator _____
 Location 1975 Springboro Pike Map Quad. South Dayton
 County Montgomery Township Moraine Section 13
 Length of Operation _____
 Areal Extent _____
 Character of Wastes Industrial, Municipal Amount _____
 Method of Operation Area Fill
 Remarks _____

GEOLOGY:

Glacial Deposits B Alluvial deposits in river bottom lands.

Bedrock Richmond and Maysville Group (shale and limestone)

Depth to Bedrock 125+ feet

Type of Cover Available sand and gravel

Quantity inadequate

Topography flat floodplain

Surface Drainage West to Miami River

Remarks _____

GROUND-WATER:

Principal Aquifer(s) Sand and Gravel deposits

Vertical Separation of Fill and Aquifer None

Distance to Nearby Wells None nearby, closest 1/2 mile upgradient from site.

Direction of Ground-Water Movement West to Great Miami River

GROUND-WATER, Continued

Remarks _____

POLLUTION POTENTIAL:

Existing or Potential Effect High pollution potential. Barrels and drums of highly toxic chemical are being accepted at the fill. No cover material is being used.

Monitor Program Monitor wells should be placed down gradient from the fill to observe the movement of any contaminants.

Comments Liquid wastes should no longer be accepted at this site because of the effect they will have on the groundwater quality in this area.

Prepared By _____

Date _____

<p style="text-align: center;">Chapter 1</p> <p style="text-align: center;"><u>AIR</u></p> <p style="text-align: center;">Criterion Compliance Decision</p> <p style="text-align: center;"><input checked="" type="checkbox"/> Complies</p> <p style="text-align: center;"><input type="checkbox"/> Does Not Comply</p>

1. Is open burning of solid wastes practiced at the facility?

☐ YES (Continue to 2)

- ☐ Records of previous open burning
- ☐ Visual observation of open burning
- ☐ Physical evidence of previous open burning

☒ NO (COMPLIES)

- ☐ Facility is a surface impoundment and does not open burn wastes
- ☐ Facility is a landspreading operation and does not open burn wastes
- ☒ Landfill which does not open burn

2. Are residential, commercial, institutional, or industrial solid wastes open burned at the facility?

☐ YES (Does not comply)

- ☐ Records of previous open burning
- ☐ Visual observation of open burning
- ☐ Physical evidence of previous open burning

☐ NO (Continue to 3)

3. Are landclearing debris, diseased trees, debris from emergency clean-up operations, silvicultural and agricultural wastes, or ordnance open burned at the facility?

☐ YES (Continue to 4)

- ☐ Records of previous burning
- ☐ Visual observation of open burning
- ☐ Physical evidence of previous open burning

☐ NO (COMPLIES)

4. Does the facility control air emissions in accordance with the State Implementation Plan (SIP) approved or promulgated by the administrator pursuant to Section 110 of the Clean Air Act?

☐ YES (COMPLIES)

- ☐ Opinion given by State agency managing the SIP
- ☐ Variances or permits under SIP examined
- ☐ Visual observations of open burning comply with SIP

☐ NO (Does not comply)

Chapter 2(b)
SAFETY - FIRES
 Criterion Compliance Decision
☒ Complies
☐ Does Not Comply

1. Does the facility have the potential for fire occurrence?

☒ YES (Continue to 2)

☐ NO (COMPLIES)

☐ Facility receives only non-flammable, non-combustible wastes

2. Does the facility comply with Section 257.3-7, of the Air Criterion?

☒ YES (COMPLIES)

☒ The facility controls the occurrence of fires through compliance with Section 257.3-7

☐ NO (Continue to 3)

3. Is periodic cover material applied so as to reduce the risk of fire?

☐ YES (COMPLIES)

☐ The facility applies and compacts cover over combustible solid waste at the end of the operating day

☐ The facility applies and compacts cover at least once every 24 hours

☐ The facility incorporates all waste into the soil at the end of the operating day

☐ NO (Continue to 4)

4. Does the facility have adequate operating procedures to control fires should they occur?

☐ YES (COMPLIES)

☐ Landfill minimizes fire hazards when conducting open burning, such as:

☐ Supervision during burning

☐ Limiting access during burning

☐ Established arrangements with the local fire department

☐ Earth stockpiles near the burning area

☐ On-site availability of heavy equipment to extinguish fires

☐ Water supply under sufficient pressure is available

☐ Fire extinguishers are available

☐ Firebreaks or fire lanes are present

Chapter 2(b)

SAFETY - FIRES

(Continued)

☐ Landfill minimizes fire hazards by proper operating procedures:

- ☐ Previous inspections and reports indicate no problem
- ☐ Permit conditions are being followed (for a fire protection plan)
- ☐ No complaints have been made
- ☐ Records of local fire department indicate no citations have been given
- ☐ High frequency of spreading and compacting all combustible wastes
- ☐ Waste materials with high fire potential are unloaded a safe distance from the working face
- ☐ Unloading of wastes adequately supervised
- ☐ Hot or burning loads are extinguished with water or soil before incorporating into the fill
- ☐ Earth stockpiles are located near the working face
- ☐ Water supply under sufficient pressure is available at the working face
- ☐ Fire extinguishers present on all equipment and buildings
- ☐ Arrangements are established with local fire fighting departments
- ☐ On-site availability of heavy equipment to extinguish fires
- ☐ Firebreaks, fire lanes are present

☐ Surface impoundment minimizes fire hazards by proper handling and storage of liquid wastes:

- ☐ Wastes are mixed to reduce flammability
- ☐ Suitable fire extinguishing equipment is present
- ☐ Established arrangements with local fire department or trained on-site personnel
- ☐ Wastes can be rapidly drained or waste flow can be controlled
- ☐ Waste can be isolated
- ☐ Impoundment is readily accessible by fire-fighting equipment

☐ Landspreading facility minimizes fire hazards by proper operating procedures:

- ☐ Suitable fire-fighting equipment is available
- ☐ Established arrangements with local fire department
- ☐ Facility is readily accessible by fire-fighting equipment

☐ NO (Does not comply)

Chapter 2(d)

SAFETY - ACCESS

Criterion Compliance Decision

☒ Complies☐ Does Not Comply

1. Is access of unauthorized persons into the facility controlled?

☒ YES (COMPLIES)

Natural controls:

- ☐ Trees and hedges
- ☒ Berms and ditches
- ☐ Cliffs and ravines
- ☐ Remoteness

Artificial controls:

- ☒ Gates
- ☒ Fences

☐ NO (Continue to 2)

2. Are authorized persons controlled within the facility so as to not expose them to potential health and safety hazards?

☐ YES (COMPLIES)

- ☐ Supervision of the unloading area
- ☐ Adequate lighting
- ☐ Posting information and direction signs
- ☐ Prohibition of scavenging
- ☐ Control of salvaging
- ☐ Trafficable roadways
- ☐ Alternate discharge point

☐ NO (Does not comply)

<p>Chapter 4</p> <p><u>GROUND WATER</u></p> <p>Criterion Compliance Decision</p> <p><input type="checkbox"/> Complies</p> <p><input type="checkbox"/> Does Not Comply <i>HIGH PRIORITY</i></p>
--

1. Does ground water contain more than 10,000 mg/l TDS, and is it not being used as a human drinking water source?

☐ YES (COMPLIES)

- ☐ Ground water is not present beneath the site
- ☐ Ground water has more than 10,000 mg/l TDS, TDS = _____ and is not used as a human drinking water source
- ☐ Ground water is not present in usable quantities beneath the site

☒ NO (Continue to 2)

- ☒ Ground water has less than 10,000 mg/l TDS
- ☒ Ground water is being used as a drinking water source

2. Rank facility according to its contamination potential.

Landfills

- ☐ Facility overlies sole source aquifer (high priority)
- ☐ Facility has a history of leachate problems (high priority)
- ☐ Ranking from Table 4-2
- Saturated zone permeability $10^{-1} - 10^{-2}$ cm/sec
- Unsaturated zone thickness 6 m
- Unsaturated zone permeability $10^{-1} - 10^{-2}$ cm/sec
- ☐ Facility is in an area where precipitation is exceeded by evaporation plus transpiration (low priority)

☒ High priority

☐ Medium priority

☐ Low priority

Surface Impoundments

Ranking from Table 4-3

Saturated zone rating _____

Unsaturated zone rating _____

☐ High priority

☐ Medium priority

☐ Low priority

Chapter 4
GROUND WATER
Continued

Landspreading Facilities

- ☐ Sludge nitrogen is being applied in excess of crop or vegetative demand (high priority)
- ☐ Ranking from Table 4-2 for industrial waste facilities

- ☐ High priority
- ☐ Medium priority
- ☐ Low priority

3. Has an underground drinking water source been contaminated by the facility beyond the solid waste (or alternate boundary)?

☐ YES (Does not comply)

- ☐ Monitoring shows contamination of a drinking water source
Contaminating substances and concentrations _____

☐ NO (COMPLIES)

- ☐ Facility does not overlie a drinking water source
- ☐ Monitoring shows no contamination beyond the solid waste
(or alternate boundary)

Chapter 5
ENDANGERED SPECIES
 (continued)

☐ YES (Does not comply - Continue to 4)

☐ NO (Continue to 4)

4. Does the facility cause or contribute to the taking of any endangered or threatened species of plants, fish, or wildlife?

Factors considered:

Type of species and species habitat _____

Species characteristics _____

Sensitivity of species and species habitat to adverse impacts _____

Proximity of facility _____

Facility size, design, and operational characteristics _____

Adverse impacts considered:

Harassing, harrning, pursuing, hunting, wounding, killing, trapping, capturing, or collecting species (direct violation of ESA, does not comply) _____

Adverse modification or loss of habitat (including air & water pollution) _____

Infringement on breeding, nesting, and feeding activities _____

Interference with species movement _____

☐ YES (Does not comply)

☐ NO (COMPLIES)

<p>Chapter 6(b)</p> <p><u>SEWAGE SLUDGE AND SEPTIC</u></p> <p><u>TANK PUMPINGS</u></p> <p>Criterion Compliance Decision</p> <p><input checked="" type="checkbox"/> Complies.</p> <p><input type="checkbox"/> Does Not Comply</p>
--

1. Are sewage sludge or septic tank pumpings applied to the surface of the land or incorporated into the soil?
 - ☐ YES (Continue to 2)
 - ☒ NO (COMPLIES)
 - ☒ Facility is a trenching or burial operation

2. Are crops planted for human consumption within 18 months after application of waste?
 - ☐ YES (Continue to 3)
 - ☐ Crops grown at time of inventory are for human consumption
 - ☐ Information from operating plan
 - ☐ Past usage or crops in the vicinity
 - ☐ Information from facility owner/operator
 - ☐ NO (Continue to 5)

3. Does the waste contact the food portion of the crop?
 - ☐ YES (Continue to 4)
 - ☐ Direct application or rainfall splash
 - ☐ Crops with food portion close to the ground
 - ☐ Taller crops that receive application early in growing stage
 - ☐ NO (Continue to 6)

4. Is the waste treated by a process to further reduce pathogens?
 - ☐ YES (COMPLIES)
 - ☐ Verification of acceptable process from appropriate source
Source used _____
 - ☐ NO (Does not comply - continue to 5)
 - ☐ Verification cannot be made

Chapter 6(b)
SEWAGE SLUDGE AND SEPTIC
TANK PUMPINGS
(Continued)

5. Is sewage sludge the waste material being applied?

☐ YES (Continue to 6)

☐ NO (Continue to 7)

6. Has the sludge been treated by a process to significantly reduce pathogens and is access controlled - 12 months for the public, and 1 month for grazing animals whose products are consumed by man?

☐ YES (Both reduction process and access control must be checked)
(COMPLIES)

☐ Verification of acceptable process from appropriate source
Source used _____

☐ Appropriate access controls are used in public access areas

☐ Facility is on private farmland not subject to frequent trespass

☐ NO (Does not comply)

☐ Verification cannot be made

☐ No access controls are used

☐ Facility is on private farmland subject to frequent trespass,
and access is not controlled

7. Has the waste been treated by a process to significantly reduce pathogens or is access prevented - 12 months for the public and 1 month for grazing animals whose products are consumed by man?

☐ YES (COMPLIES)

☐ Verification of acceptable process from appropriate source
Source used _____

☐ Access controlled

☐ NO (Does not comply)

Chapter 7

APPLICATION TO LAND USED FOR THE
PRODUCTION OF FOOD CHAIN CROPS

(Continued)

4. Is the solid waste and soil mixture at pH 6.5 or greater at the time of solid waste application or at the time the crop is planted, whichever occurs later?

☐ YES (COMPLIES)

☐ NO (Does not comply - continue to 5)

5. Is the background soil pH greater than 6.5 or are there adequate safeguards to assure that the soil pH will be maintained at 6.5 or higher whenever food chain crops are grown?

☐ YES (Continue to 6)

☐ SCS maps or reports, or local agricultural extension service

☐ Laboratory analysis

☐ pH of soil is controlled whenever food chain crops are grown.

☐ NO (Go to 7)

6. Does the soil cadmium concentration exceed 5 kg/ha with a CEC of less than 5, or 10 kg/ha with a CEC of 5 to 15, or 20 kg/ha with a CEC greater than 15?

☐ YES (Does not comply)

☐ NO (COMPLIES - Go to 8)

7. Has the cumulative application of cadmium exceeded 5 kg/ha?

☐ kg/ha cadmium in soil _____

☐ kg/ha cumulative application _____

☐ YES (Does not comply - continue to 8)

☐ NO (COMPLIES - continue to 8)

8. Is the annual application rate of cadmium in excess of 2 kg/ha (1.25 kg/ha after 1/1/84 and 0.5 kg/ha after 1/1/87)?

☐ kg/ha/yr cadmium application rate _____ (see Figure 7-3)

☐ YES (Does not comply - continue to 9)

☐ NO (Continue to 9)

Chapter 7

APPLICATION TO LAND USED FOR THEPRODUCTION OF FOOD CHAIN CROPS

(Continued)

14. Is the milk or animal feed monitored to assure that the PCB concentrations are less than 1.5 mg/kg (fat basis) in milk, or less than 0.2 mg/kg in animal feed?

☐ YES (COMPLIES)

☐ NO (Does not comply)

Chapter 8

FLOODPLAINS

(continued)

☒ YES (Complies)

- ☐ State washout assessment or 404 permit
- ☒ Site analysis of washout protection

☐ NO (Does not comply)

- ☐ Washout by flood of lesser magnitude than the 100-year flood
- ☐ Site analysis of washout protection

Chapter 8

FLOODPLAINS

(continued)

- ☒ Facility located in a floodplain where the channel is diked to contain the base flood
- ☐ Facility increases base flood level more than 1.0 foot

Priority of facility:

- ☐ Regulatory floodway area - priority 1
- ☐ High flood hazard potential area (Table 1-1) - priority 2
- ☐ Low flood hazard potential area (Table 1-1) - priority 3

Factors considered in flood hazard potential assessment:

Base Flood characteristics: _____

Floodplain topography: _____

Floodplain hydrogeology: _____

Facility characteristics: _____

Natural resources in and adjacent to the floodplain: _____

Land use in and adjacent to the floodplain: _____

- ☐ YES (Does not comply - Continue to 4)
- ☒ NO (Continue to 4)

4. Is the facility protected from washout by the base flood so as not to pose a hazard to human life, wildlife, or land or water resources?

Factors considered for washout protection:

Types and Efficiency Protection:

- ☒ Dike or levee _____
- ☐ Berm _____
- ☐ Flexible linings _____
- ☐ Vegetative cover _____
- ☐ Riprap _____
- ☐ Diversion of surface flow _____
- ☐ Change in soil matrix _____
- ☐ Other _____
- ☐ None _____
- ☐ Flood flow velocity _____

COMMENTS AND RECOMMENDATIONS:

ON FEBRUARY 20 AND 27, 1969 A REPRESENTATIVE OF THIS DEPARTMENT INSPECTED THE SOUTH DAYTON DUMP AND LANDFILL. THE ABOVE VIOLATIONS WERE NOTED AND YOU BEING THE LICENSEE OF THE SITE, MUST COMPLY WITHIN THIRTY (30) DAYS WITH THE MONTGOMERY COUNTY SANITARY REGULATION 65, ELATIVE TO DISPOSAL OF SOLID WASTES.

SECTION 65.65 ALL GARBAGE AND REFUSE SHALL BE SPREAD IN LAYERS OF APPROXIMATELY ONE (1) FOOT AND THOROUGHLY COMPACTED WITH HEAVY EQUIPMENT. AT THE END OF EACH DAYS OPERATION, THE AREA SHALL BE COVERED WITH A MINIMUM OF SIX (6) INCHES OF EARTH AND THOROUGHLY COMPACTED. NO EXPOSED GARBAGE OR REFUSE WILL BE PERMITTED AT THE CLOSE OF DAILY OPERATION.

SEPARATION OF REFUSE REQUIRING LANDFILL SHOULD BE MADE FROM INERT INDUSTRIAL WASTE. NO PAPER SHOULD BE ACCEPTED UNLESS IT IS LANDFILLED. (SEE SECTION 65.67)

SECTION 65.67 NO BURNING WILL BE PERMITTED ON THE LANDFILL SITE AS STIPULATED BY THE BOARD

COMMENTS AND RECOMMENDATIONS:

Inspections of the above industrial waste disposal site
were made on April 17, 1970, and on May 25, 1970, by the
undersigned sanitarian.
Discussion with Mr. Kenneth Grilliot, on
May 25, revealed that at present the above site is
accepting solid fill material, metal, and wood
refuse. Solid fill material is deposited in the northern
area,
portion of the landfill, metal is deposited in the
central portion of the area, and wood is burned in the
western portion of the area. Periodically, metal is
salvaged for sale from the above site.
We must require that you continue your rodent elimination
program on a regular basis in the future.

Sept. 2, 1969

Dear Sir:

I received an order from John H. Bindeman, tuesday Sept. 2. 1969, by Certified mail Stipulating I should stop burning on the landfill site. I do not operate a landfill operation and have not landfilled since about 1955. We do not accept household trash or resturant trash.

I have stated to you, Mr. Binderman, and Dave Peden, we would only accept items that can be burned.

As you know I have reduced the volume of the material, and cater to the Industry in the general area, brush, wood, woodwepalets and Industrials wastes.

Sincerely yours

Alcine Grillot

September 29, 1969

RECEIVED

Dr. Robert Vogel
Health Commissioner
Montgomery County Health Dept.
325 W. Second Street, Dayton Ohio

MONTGOMERY COUNTY
HEALTH DEPT.

Dear Sir;

In regard to your letter of Sept. 25, 1969, on the completion of Engineering plans for the South Dayton Dump, we are not going to operate a solid waste disposal site in the terms of burning paper, wood and other unburned rubbish and wastes.

As of January 1, 1970, we will only accept dirt, concrete, fly ash, brick, incenerator ash or other unorganic material which the Board of Health will approve.

I have checked as to the cost of engineering plans and have estimated costs of approximately \$4,500.00. This cost plus a \$500.00 permit to the Board of Health would be an investment of \$5,000.00.

I did invest \$500.00 for a permit in 1969 but as I stated with our operation it was only a donation as we did not plan on operating a Land Fill.

We would request at this time that the requirement for engineering plans be dropped for the remainder Of 1969.

Sincerely yours,

Alcine S. Grillot
Alcine S. Grillot
South Dayton Dump

ASG/dag

★ Alcine had called and made this statement. I asked him to submit this in writing. I believe it would be appropriate to allow the request, stipulating if he changes his mind plans must be submitted to application.

DEC 15 1969

MONTGOMERY COUNTY
HEALTH DEPT.

Robert A. Vogel M.D.
Health Commissioner
Montgomery County Ohio

Dear Sir;

As to our conservation in regard to my operation at the South Dayton Dump, I do request an extension of the previous waiver on requirements for engineering plans until the Incinerator goes into full operation. The final date should remain open and subject to your final order. The prior waiver was dated Oct. 8, 1969 thru Dec. 31, 1969.

As we all know there will be a lot of confusion when the Bertwyn Lane facility goes into operation, it is not hard to control household wastes but industrial wastes will be a big problem.

I will cooperate in any way to be of service to the operation and would even consider taking the residue from the Incinerator if they have a problem of disposing of the ash.

Sincerely yours,
Aldine S. Grillot

Dayton, Ohio

Re South Dayton Dump

Dear Mr. Grillo:

As you recently requested, permission is hereby granted to burn certain materials at the South Dayton Dump and Land-fill under the following conditions:

- (a). Only waste lumber and tree trimmings are to be burned.
- (b). Burning must be confined to an area separate from the operating fill area.
- (c). Burning must be completed between the hours of 10:00 a.m. and 4:00 p.m. and only when wind is of sufficient velocity and proper direction to minimize the effect of smoke emissions on nearby residences and businesses.

Permission to burn is granted until Friday, May 15, 1970. After that date open burning throughout Montgomery County will be permitted only after submission of written application to this office for a formal permit. All applications must be accompanied by a money order, certified check - made out to the Montgomery County Health Department, or cash in the proper amount, depending upon the requested duration of the permit. The fee for a permit is five dollars (\$5.00) for a permit up to six consecutive days (no burning is permitted on Sunday), and five dollars (\$5.00) per week for a permit extending beyond one week.

If you have any questions concerning this matter, please do not hesitate to call me.

Sincerely,

DAVID B. PEDEN, R.S., M.P.H.,

Dear Mr. Spies:

As requested by Mr. Ivan Baker of the Ohio Department of Health, I am sending you, under separate cover, four (4) copies of the plans for an "air curtain destructor", both permanent and portable models. It is hoped that one or more of these devices will be installed in Montgomery County for the principal purpose of disposing of tree limbs, tree trimmings, pallets, and other clean wood waste. We recognize, under the Ohio Revised Code, that such installations as solid waste disposal facilities must be reviewed by your department and if approved, the appropriate fee submitted. Therefore, specific location plans, dimensions and other pertinent information will be filed at that time. In the interim, we would appreciate your opinion of this device as a disposal unit for those materials mentioned above, as well as any other suggestions you may have for disposing of such refuse.

If you have any questions on this matter, please do not hesitate to call me.

Re: Montgomery County
Solid Wastes

Southwest District Office
Knott Bldg. - 3rd Floor
40 South Main Street
Dayton, Ohio 45402
Tel. 461-5490

August 5, 1970

Robert A. Vogel, M.D.
Health Commissioner
Montgomery County Health Department
325 W. Second Street
Dayton, Ohio 45402

Dear Dr. Vogel:

On July 2, 1970 plans of proposed portable and permanent air curtain destructor type burner were received from Mr. Auberle, of your air pollution unit.

The plans call for a trench 8' wide and 12' in depth and 15' in length. Across the top and at an angle, air will be directed from a 30" diameter pipe. Air will be supplied by a 12,000 CFM industrial fan driven by a gasoline or diesel engine.

The request was to utilize these devices for burning clean lumber which would include tree limbs, tree trimmings, pallets and other clean wood waste.

This plan appears to be satisfactory and could be tried on an experimental basis, providing your air pollution unit believes that it will produce no odors and pollutants which will be in conflict with your air pollution code. This burner will be observed on an experimental basis to determine its feasibility and operational characteristics.

Very truly yours,

Arthur T. Kneuer
District Sanitary Engineer

Re: Solid Waste Disposal Site
South Dayton Dump & Landfill
1975 Springboro Road
Dayton, Ohio

Attention: Mr. Arthur Knauer

Dear Mr. Knauer:

We have enclosed a letter from Mr. Alcine Grillot requesting approval of an Air Curtain Destructor to be located on his dump site in the City of Moraine. He is planning on locating the Destructor as shown on the four (4) copies of the enclosed plot plan. The Air Curtain Destructor itself is being purchased from the St. Louis Blow Pipe and Heater Company, 1948-60 North 9th Street, P.O. Box 5504, Bremen Station, St. Louis, Missouri, 63160. This seventeen foot long unit will be installed next to a burning pit, exactly as shown in the four copies of the Air Curtain Destructor that were recently sent to your office for approval.

The owners of this Destructor wish to have it installed as soon as possible. We would appreciate making a joint visit to the property at your earliest convenience.

Sincerely yours,

ROBERT A. VOGEL, M. D.,
Health Commissioner

Dayton, Ohio 45439Re: Moraine Recycling Inc.
1975 Springboro Road
Miamisburg, Ohio

Dear Mr. Grillot:

C Pursuant to Mr. Durkhart's and my visit on Friday, October 16, 1970, we are writing this letter to inform you that our preliminary inspection of the Air Curtain Destructor indicated that it may, indeed, conform to the criteria of the Air Pollution Control Regulations. As soon as the electrical connections are completed and the final adjustments are made, we would be pleased to join you for your first trial run.

O At this time, the Ohio Department of Health is still processing your application to operate a Solid Waste Disposal Facility on this site. Since you have nearly completed the air curtain and since we have received your application and check for a Solid Waste Disposal Facility, we recommend you start the air curtain destructor as soon as possible for an experimental shake down. During this several week period, your operation will be covered by open burning permits issued by our Air Pollution Bureau. If you have not already done so, we recommend that you make application for an open burning permit from Mr. William Auberle, Supervisor, Air Pollution Control Bureau, 6175 West Third Street, Dayton, Ohio.

P As soon as you get into operation, several representatives of the Ohio Department of Health wish to evaluate your air curtain destructor.

Y Please call us if you have any questions.

Very truly yours,

Moraine Recycling, Inc.

Dear Mr. Knauer:

As you are aware, two permanent installations of air curtain destructors are underway in Montgomery County, one of which is at South Dayton Dump on South Broadway by Moraine Recycling, Inc. I feel sure that you are also aware of the support the Montgomery County Health Department has given to this installation. The necessity of providing some means for disposal of vegetation and wood wastes became evident when enforcement of the open burning prohibition in Montgomery County was initiated. The prior practice of burning this material in the open was unsuitable from an air pollution control point of view; and design and operating difficulties at the two county reduction plants made disposal of this material at these facilities impossible. A third alternative, the disposal of this material in a sanitary landfill was unfeasible, due to the closing of landfills in the area, and the undesirability of disposing of this bulky material in a landfill. We, therefore, supported the construction of a limited number of air curtain destructors to dispose of this material, one of which is now being built by Moraine Recycling, Inc. This device is not considered an incinerator, but is considered controlled open burning. Provisions are made in the open burning regulation which provide for special open burning permits. It is this provision under which this device will be operating.

The installation at Moraine Recycling, Inc. does not follow the specifications which were provided that firm when this installation was initially discussed. For this reason, we have notified Mr. Alcine Grilliott and Mr. Lawrence Brannon, proprietors, of our reservations about this unit. This does not mean, however,

Mr. Arthur Knauer
Page 2
October 23, 1970

that we consider this unit unsuitable for disposing of the material for which it was designed.

If you have any questions regarding our position on this matter, please don't hesitate to call on me.

Sincerely,

ROBERT A. VOGEL, M.D.
Health Commissioner

Dear Sir:

#3059

#3060

This is to advise you that land known as Lot #3277, City of Moraine, at 1975 Springboro Road is zoned M-2, Industrial.

This classification permits the use of the tract for burning of trees, brush and shrubbery, with a permit from Council, signed by the Mayor and subject to County Board of Health regulations.

Attached is a copy of permit granted Alcine Grillot by Council for the year ending April 1, 1971.

Sincerely yours,

John F. Bush

I. ARE THE FOLLOWING ITEMS SHOWN, IN DETAIL, ON THE PLANS (?):

YES A. Vicinity map.

YES B. Location of public roadways (access roads), communities, habitable buildings, etc., that are on or about the site.

YES C. Clearly defined limits of all land owned or leased by the owner for this project.

YES D. Drawings or maps showing existing and final topography (Scale: maximum 1 inch = 200 feet and contour intervals not greater than 5 feet.)

YES E. Clearly defined limits of all land to be used for disposal purposes.

- YES F. Clearly defined inclement weather areas. ALL AREAS ARE COMPACTED AND USABLE, ALL YEAR ROUND.
- G. Any areas that are to be reserved for unusual or specific wastes.
- YES H. Cross section (typical) and location of all on-site roads.
- NONE I. Location of any public or private water supply well within 1,000 feet of the outer limits of the fill area.
- YES J. Longitudinal cross section of a completed cell. REFER TO PAGE 5.
- YES K. All fencing, gates and natural screening on or about the facility. Gates and fencing may be required to control access to site or facility.
- YES L. The location of any existing or proposed maintenance building, weighing facilities, storage buildings, employee usage buildings, etc.
- YES M. An indication of the direction of flow and point of concentration of all surface waters on the site. NO ACCUMULATION.
- NOTE: This indication must include, where applicable, drainage plans showing:
1. Grades
 2. Diversion trenches.
 3. Special drainage devices to be used for the control of:
 - a. Surface erosion.
 - b. Disposition of underground waters outletting within the confines of the site.
- YES O. Location of existing and proposed utilities including water supply, sewerage, electricity, gas, telephone or other means of communication, etc.

II. ARE THE FOLLOWING INCLUDED (?):

- YES A. Letter of submittal from owner.
- YES B. Letters of acknowledgement or acceptance from: SEE LETTERS ATTACHED.
1. Local Health Department,*
 2. Local Zoning Board,*
 3. Local Planning Commission,*
 4. District Engineer's site approval,
 5. Department of Natural Resources Geologist, if requested in District Engineer's site letter,
 6. Any other agency having jurisdiction.
- *NOTE: Such letters must indicate knowledge of proposed operation and whether such operation is in conformance with existing policies, regulations, and land use plans.
- YES C. Description of daily operation of site or facility including unloading of solid wastes from transportation vehicles, on-site handling of wastes, traffic pattern and actual disposal method.
- NOTE: This item is extremely important. It may be shown on plans with notes or in a narrative description. THE TRUCKS ENTER THE GATE AND ARE INSPECTED BY GATE MAN WHO GIVES A TICKET TO THE DRIVER AND DIRECTS HIM TO THE SALVAGE SLAB. THE OPERATOR INFORMS HIM WHERE TO DUMP THE LOAD, WOOD IS PUSHED INTO THE BURNER, CARDBOARD IS SALVAGED AND HAULED TO A PAPER CO. NON BURNABLE TRASH IS PUT IN DRAG ON CONTAINER AND HAULED TO INCINERATOR TO BE BURNED.

YES D. Description of systematic usage of area and completion of landfill areas. (COMMERCIAL)

YES E. Description of how the area surrounding the sanitary landfill will be blended in with the finished fill area(s). NOTE: Will there be enough fill or cover material available? MORE THAN ENOUGH FILL AND COVER MATERIAL. FINISHED AREA WILL BE FILLED TO EXISTING GRADE. NO HIGHER.

X F. Information indicating soil characteristics, depth to rock and depth to maximum elevation of ground water saturation, including reports from other agencies, if requested by District Engineer. REFER TO MIAMI CONSERVANCY DISTRICT MAP.

 G. Other information pertinent to the proper operation of a solid waste disposal site or facility in accordance with HE-24-09.

III. PLEASE ANSWER THE FOLLOWING QUESTIONS:

A. How many wells are within:

1. 1,000 feet of the landfill area? NONE
(Are these shown on the plans? NONE)
2. 1,500 feet of the landfill area? NONE
3. 2,000 feet of the landfill area? NONE

B. Source of cover material will be from DAYTON POWER & LIGHT, DAYTON STEEL FOUNDRY AND OTHER INDUSTRIES

C. Type of cover material will be DIRT, GRAVEL, FOUNDRY SAND, ASH, CINDERS ETC.

D. Quantity of cover material is UNLIMITED cu. yds.

E. The following utilities will be on the landfill (please check):

- | | |
|---------------------------|--|
| 1. Water <u>YES</u> | 4. Gas <u> </u> |
| 2. Sewerage <u> </u> | 5. Telephone <u>YES</u> |
| 3. Electricity <u>YES</u> | 6. Other means of communications <u> </u> |

F. Briefly describe, where applicable, the measures that will be utilized for:

1. Dust control OIL
2. Erosion control NO PROBLEMS AS AREAS ARE CINDERED AS THEY ARE FILLED TO FINISHED GRADE.
3. Control of blowing debris FENCING AS NEEDED.

4. Fire protection, fire prevention, and fire control CITY OF MORAINÉ
FIRE DEPT. FIRE HYDRANT ON PROPERTY. FIRE HOUSE WITHIN 1 MILE.
5. Salvaging control SALVAGE MATERIAL TO BE REMOVED DAILY.
6. Burning control; this to include permission letter from your local health department if any burning is to take place SEE LETTER ATTACHED.
- G. Fully describe the equipment that will be used to prepare, operate and maintain this facility, include types and weights TD 14 INTERNATIONAL WEIGHT
APPROX. 14 TON. 955 FRONT END LOADER WEIGHT APPROX. 11 TONS.
- H. What is the specific availability of stand-by equipment? NOTE: This requirement may be fulfilled by lease arrangements or by owning surplus equipment.
EMERGENCY EQUIPMENT TO BE LEASED FROM BROADWAY SAND AND GRAVEL.
THIS EQUIPMENT IS LOCATED ON THE SAME TRACT OF LAND.
- I. What is the maximum period of equipment down time planned before stand-by equipment will be placed in service? List each piece of equipment separately as given in III-G.
ONE DAY.
- J. What is the intended use of the land, if any, during the operation of the landfill?
NONE OTHER THAN FOR OUR OWN OPERATIONS.
- K. What is the intended use of the land after the completion of the landfill operation?
INDUSTRIAL BUILDING SITES.
- L. What type maintenance is planned for the completed fill areas during periods of settlement and erosion? WE DO NOT HAVE THIS PROBLEM AS NO UNBURNED
MATERIALS ARE USED FOR FILL.
- M. What types and quantities of solid wastes are anticipated to be received; i.e., "community type" wastes, dry industrial wastes, toxic or hazardous wastes, etc?
INDUSTRIAL WOOD PRODUCTS, TREE TRIMMINGS, COMMERCIAL WOOD SCRAP,
AND ANY OTHER MATERIAL AS RECOMMENDED BY THE MONTGOMERY COUNTY BOARD
OF HEALTH THAT WILL CONFORM WITH AIR POLLUTION STANDARDS.

UNLIMITED QUANTITIES THAT WE CAN HANDLE.

- N. What is the anticipated lifetime of the project? INDEFINITE years.
- O. The estimated cost of this project, including equipment is \$ 35,000.00.
NOT INCLUDING LAND.

To the best of my knowledge, all information included with this transmittal is true and correct:

Re: Montgomery County
Moraine
Moraine Recycling, Inc. - Solid Waste
Disposal Facility
Plans Received November 13, 1970

January 5, 1971

To Mr. Alcino Grillot, President
Moraine Recycling, Inc.,
2708 Kreitzer Road
Moraine, Ohio 45439

Gentlemen:

You are hereby notified that the Ohio Department of Health in accordance with the provisions of Section 3734.02, Ohio Revised Code, has this day approved the plans of the referenced project subject to the following conditions:

That the owner shall provide for the proper maintenance and operation of the solid waste disposal site or facility in accordance with the provisions of Regulations HE-24-01 to HE-24-12, Ohio Sanitary Code;

That the specifications and approved plans shall be adhered to;

That any wastes not covered by the approved specifications and plans shall not be accepted for disposal without the approval of this department;

That the Ohio Department of Health shall be notified when the proposed facilities are completed and prior to operation.

This approval is limited to conformity with accepted sanitary engineering practices and to the elimination of other conditions that may adversely affect the public health.

Please acknowledge receipt of this letter and state your acceptance of the conditions imposed.

Yours truly,

E. W. Arnold, M.D.
Director of Health

Re: Montgomery County
Solid Waste

February 24, 1971

Robert A. Vogel, M.D.
Health Commissioner
Montgomery County Combined Health District
325 West Second Street
Dayton, Ohio 45402

Dear Dr. Vogel:

A survey of Montgomery County's Solid Waste Disposal Program has been completed.

The results of our evaluation show that much has been accomplished in this program. It is because of the accomplishments that it is difficult to inform you that we can only recommend interim approval for your solid waste disposal program at this time. This means that your program complies to a substantial degree to the 1971 program approval criteria, but court action or inaction prevents you from enforcing the law on the General Sanitation Corporation Disposal Site.

Your department continues to press for a conclusion and a resolution of legal entanglements appears possible within 60 days.

The specific findings of this evaluation are as follows:

1. Incinerators - Two modern incinerators of the Volund design have been constructed and are in operation in Montgomery County. One located north of Dayton and one located south of Dayton. Each incinerator has a capacity of 600 tons of solid waste per day. Nearly all of the solid waste generated in Montgomery County, including the City of Dayton, is burned at the incinerators.
2. Sanitary Landfill Company - This landfill, located south of Dayton, receives mostly non-combustible wastes which cannot be disposed at the south incinerator. It is also the back-up disposal site for the south incinerator if it were to shut down for any length of time. This site was being operated in a satisfactory manner at the time of the inspection.
3. Powell Road Landfill - This landfill located north of Dayton, serves as the back-up to the north incinerator and receives wastes which cannot be disposed at the north incinerator.

Page 2, Montgomery County Solid Waste, Feb. 24, 1971

The operation of this landfill needs improvement. Older portions of the fill remain to be covered. All new incoming waste should be spread, compacted and covered on a daily basis. Items to be salvaged should be removed on a daily basis or properly stored so that they will not create a nuisance rat harborage or unsightly appearance.

This site is to be the location of the third stationary air curtain destructor in the county. It would appear to be the best constructed, but, to date no plans have been received by the Ohio Department of Health.

The air curtain destructors are for burning clean lumber, tree trimming, pallets and other clean wood wastes. They are basically a trench, 8 feet wide, 15 feet long and 12 feet in depth. Across the length, at the top, air is directed at a 30 degree angle over material burning in the trench. When operated properly there is a significant reduction in visible pollutants.

4. Moraine Recycling Inc. - This is the site of the first air curtain destructor in Montgomery County. This burner, which had walls of steel plates, has self-destructed. The side walls have distorted to the extent that the proper control of the air curtain cannot be accomplished. This burner has been shut down periodically to permit necessary repairs. Indications are that it will be necessary to be completely rebuilt. Paper is reclaimed at this site for reprocessing.

5. Southern Hills Wood Disposer - This is the site of the second stationary air curtain destructor in Montgomery County. The trench walls of this burner consist of tamped clay. This site has been in operation only a short period of time.

{ This site should be licensed as a solid waste disposal site and immediately given notice of the requirement to submit plans of the operation to the Ohio Department of Health.

6. General Sanitation Corporation - This is an open dump operation which your department has done everything within it's power to correct. It is presently in court litigation.
7. Incinerator Residue Disposal - Regulation HE-24-10(D) of the Ohio Sanitary Code requires that the site for and method of incinerator residue disposal shall be approved by the Ohio Department of Health.

All local officials responsible for the incinerators and their operation which would include disposing of the residue should be notified of the above requirement. This would help assure that the method of disposal will not create a nuisance, cause or contribute to water pollution or create a health hazard.

Page 3, Montgomery County Solid Waste, Feb. 24, 1971

We commend you, Mr. Peden and Mr. Bindeman for the progress which has been achieved in the solid waste disposal program in Montgomery County. As soon as the status of the General Sanitation Corporation's court litigation improves we will gladly re-evaluate and I feel confident that we can then grant an unconditional approval.

Sincerely yours,

M. Joe Moore
District Sanitarian
Solid Waste Specialist

CONDITIONS OF LICENSURE

1. That the air curtain destructor shall be operated properly and used for burning only wood.
2. That wood shall be carefully fed to the air curtain destructor so the wood is burned in the pit below the air curtain.
3. That the ash shall be removed from the air curtain destructor as necessary and the ash shall be covered to prevent blowing.
4. That the air curtain destructor shall be kept in continual good repair, (air volume, air direction, pit dimension, & operating temperature shall meet design specifications).
5. That a salvaging operation shall be permitted under the following conditions:
 - a. All waste paper shall be cleaned from the salvage area and placed in the waste container by the end of each day's operation.
 - b. All waste wood shall be burned in the air curtain combustor by the end of each day's operation.
 - c. All cardboard shall be removed from the property or stored in enclosed trucks or containers at the end of each day's operation.
 - d. That blown waste paper, plastic, etc., shall be cleaned up at the end of each day's operation.
 - e. That the volume of solid waste salvage material accepted shall be regulated to insure a, b, c, & d can be complied with.
6. That provisions be made for adequate amounts of water to be available at the destructor site for use during fire emergencies.

RECEIVED

JAN 8 1973

Ohio Environmental Protection Agency
SOUTHWEST DISTRICT

Robert Vogel, M. D.
Health Commissioner
Montgomery County Health Department
451 West Third Street
Dayton, Ohio 45402

Attn: Mr. John Binderman

Dear Mr. Vogel:

In accordance with Section 3734.03 of the Ohio Revised Code, the annual Solid Waste Survey of your Department was conducted on December 26, 1972.

The survey consisted of a review of the office records, the individual disposal sites and facilities along with discussions regarding the program with Mr. John Binderman during the survey.

As can be readily seen from the survey results, your staff are performing excellently. The few debits on Administration were discussed and I feel that these will be taken care of immediately.

In regards to the Sanitation of the Incinerators, the only remarks I could make would be that the South Plant should make definite advances in taking care of their residue as it is a potential hazard. During these inspections I did take into consideration the difficulties the plants are experiencing with the Air Pollution equipment and the engineering studies.

In reference to the Sanitation of Landfills, I only feel that the Powell Road and Gettysburg Landfills need some more attention, which Mr. Binderman assured me they would receive.

I am suggesting to the Director of the Ohio Environmental Protection Agency that the Montgomery County Health Department's Solid Waste Program be approved.

Sincerely,

Orville D. Ball RPS

CERTIFICATION OF SOLID WASTE FACILITIES AND SITES IN

MONTGOMERY COUNTY HEALTH DISTRICT TO DIRECTOR OF
ENVIRONMENTAL PROTECTION

Solid Waste

LAW

Section 3734.07 (B)

Within thirty days after the issuance of a license, the board of health shall certify to the director that the solid waste facility or site has been inspected and is in satisfactory compliance with section 3734.01 to 3734.11, inclusive, of the Revised Code. Each board of health shall provide the director with such other information as he may require from time to time.

CERTIFICATION

This is to certify that the 7 solid waste facilities and
(number)
sites on the attached list have been inspected and are in satisfactory compliance with section 3734.01 to 3734.11, inclusive, of the Revised Code and that the licenses were issued from Dec. 21-72 to Jan. 30, 1973

GUIDELINES FOR PROPER OPERATION OF AIR CURTAIN DESTRUCTOR

1. That the air curtain destructor shall be operated properly and used for burning only wood.
2. That wood shall be carefully fed to the air curtain destructor so the wood is burned in the pit below the air curtain.
3. That the ash shall be removed from the air curtain destructor as necessary and the ash shall be covered to prevent blowing.
4. That the air curtain destructor shall be kept in continual good repair (air volume, air direction, pit dimension, and operating temperature shall meet design specifications).
5. That a salvaging operation shall be permitted under the following conditions:
 - a. All waste paper shall be cleaned from the salvage area and placed in the waste container by the end of each day's operation.
 - b. All waste wood shall be burned in the air curtain destructor by the end of each day's operation.
 - c. All cardboard shall be removed from the property or stored in enclosed trucks or containers at the end of each day's operation.
 - d. That blown waste paper, plastic, etc., shall be cleaned up at the end of each day's operation.
 - e. That the volume of solid waste salvage material accepted shall be regulated to insure a., b., c., and d., can be complied with.

LANDFILL

1. Only dry inert industrial, commercial, or household material may be accepted. Any garbage or other solid waste that requires daily cover must be rejected.

Re: Proposed Landfill Site
Lot 3277
2089 South Broadway
City of Moraine

Dear Mr. Cornett:

Your letter dated June 7, 1976 indicated you wish to fill Lot 3277 in the City of Moraine with, "dirt, concrete, asphalt, and other debris". The first three (3) items you list are classified as not being inimical (harmful) to the public health and are therefore exempt from the requirements of a license under the Ohio Solid Waste Disposal Act (Section 3734.01 to 3734.11 ORC). However, the term other debris is too vague to make a decision on.

This department has no objection to the filling of this property, if the following conditions are met:

1. That only dirt, concrete, and asphalt shall be used for filling; and
2. If you wish to fill with other non-inimical wastes, that we shall be contacted and give a written approval before they are accepted; and
3. That the entrance shall be secured with a gate or cable to prevent unauthorized dumping; and
4. That if unauthorized dumping of any solid waste material does take place, it will be immediately removed to the county incinerators or a licensed landfill. (Solid wastes are defined by Section 3734.01 (E) of the Ohio Revised Code, "SOLID WASTES means such unwanted residual solid or semisolid material as results from industrial, commercial, agricultural, and community operations, and includes garbage, combustible and non-combustible material, street dirt, and debris."); and

Re: *South Dayton Landfill*, 1975 Springboro Road, Dayton, Ohio 45439

Dear Mr. Grillot:

Representatives from this office and the Ohio Environmental Protection Agency visited your licensed landfill operation located at 1975 Springboro Road on May 11, 1978 for the purpose of conducting a general inspection. At that time we found that the conditions of our letter dated June 16, 1976 have not been followed as required, and we also found that a nuisance condition exists. The problems are as follows:

1. That on-site compacting and area filling with dirt, concrete, and asphalt has not been conducted satisfactorily; and,
2. That we could find no area that had been filled and covered with at least two (2) feet of soil that would support vegetation; and,
3. That containers labelled as hazardous are on the premises with some of the contents still in them.

Based upon these findings, we must notify you to eliminate these stated nuisance conditions by:

1. Compacting and covering all materials on the site that are considered to be waste (excluding salvage materials) and provide at least two (2) feet of final cover that will support vegetation.
2. Do not accept drums or plastic containers that are labelled as "Hazardous" unless the containers have been washed and the hazardous materials removed prior to acceptance at your landfill. Hazardous materials can only be deposited on sites that are licensed to accept them. Remove all hazardous containers from the premises for washing and/or other disposal. Do not bury these containers on your site prior to washing.

 - a. All waste paper shall be cleaned from the salvage area and placed in the waste container by the end of each day's operation.
 - b. All waste wood shall be burned in the air curtain destructor by the end of each day's operation.
 - c. All cardboard shall be removed from the property or stored in enclosed trucks or containers at the end of each day's operation.
 - d. That blown waste paper, plastic, etc., shall be cleaned up at the end of each day's operation.
 - e. That the volume of solid waste salvage material accepted shall be regulated to insure a., b., c., and d., can be complied with.

LANDFILL

1. Only dry inert industrial, commercial, or household material may be accepted.
2. Fly ash and bottom ash may be accepted if it is covered with earth daily or kept sufficiently moist to prevent blowing in the pit or along the entrance drive.
3. Any garbage or other solid waste that requires daily cover must be rejected.

Re: South Dayton Landfill, 1975 Springboro Rd., Moraine, Ohio

Dear Mr. Grillot:

This letter will confirm our recent reinspection of your landfill on January 8, 1980. We were pleased to note that many of the 55 gallon drums and plastic chemical containers had been moved since our previous inspection in late November, 1979. You should continue to store these containers neatly until they are sold.

During our recent phone conversation you informed us that you sold all used chemical drums and plastic containers. This is satisfactory.

However, if you plan on burying any of these containers that are labeled hazardous or poisonous we must have written confirmation from the last user of the container that it has been washed or cleaned of all hazardous or poisonous contents. (Although all the containers we checked appeared to be empty we noted many were labeled poison - lead Floroborate).

Your removal or burying of other odds and ends around the fill site (including the old trailer) should continue.

Sincerely,

John H. Bindeman
Systems Analyst

Solid Waste*

Re: Solid waste disposal

Dear Mr. Gilmore:

We recently learned that you are transporting white plaster dust from the Ohio Precision Castings, Inc. and disposing of it in your foundry sand disposal site on Brandt Pike. In addition we learned you anticipate transporting fly ash from Cargill, Inc. to this same site.

The Ohio EPA has determined that both these industrial wastes are "solid waste" and therefore must be disposed of in a licensed landfill. Your foundry sand disposal site is not licensed.

The fly ash can be taken to any licensed landfill that can handle it. In Montgomery County the following sites which are suitable:

1. North Sanitary Landfill, 4220 Pinnacle Rd., Moraine
2. Powell Road Landfill, 4060 Powell Rd., Wayne Twp.
3. South Dayton Landfill, 1975 Springboro Pike, Moraine
4. Moraine Materials - Dryden Rd. Complex, Rear of 3265 Dryden Rd., Moraine
5. Moraine Materials, Hurt B Pit, Farmington Rd., Miami Twp.

The white plaster dust may only be taken to the first three licensed landfills in Montgomery County.

Mr. Russell A. Gilmore III
March 24, 1980
Page Two

This letter shall be considered an official order to dispose of all fly ash and white plaster dust in a licensed landfill within seven (7) days. Authority for this order can be found in Section 3734.05, Ohio Revised Code.

If you have questions concerning this order, please call 225-4443.

Sincerely,

John H. Bindeman
Systems Analyst

Description of violations and recommendations for corrections: An inspection of the facility on April 21, 1982, indicated the following violation:

Scrap cardboard, paper litter, cardboard boxes, and cardboard drums were being stored outside which is in violation of your permit to operate (3745-27-08-A).

All cardboard shall be removed from the property or stored in enclosed trucks or containers at the end of each day's operation and all blown waste paper, plastic, etc. shall be cleaned up at the end of each day's operation.

Two drums containing a white powder from Delco were labelled "hazardous waste". Mr. Randy Marshall, OEPA, was consulted and a joint reinspection was conducted on 4/23/82. Mr. Robert Young, Delco, was contacted that day and I later met him to locate the drums at the site. Although the material was identified as non-hazardous, the material should not have been there. The drums were removed.

You are hereby notified of the above violations. Failure to correct these violations within _____ days may result in the revocation, suspension or denial of your solid waste disposal license or other legal action.

If assistance in correcting these violations is desired, contact your Local Health Department and/or district office of the Environmental Protection Agency.

CERTIFIED MAIL

Mr. Alcine Grillot
2708 Kreitzer Road
Moraine, OH 45439

Dear Mr. Grillot:

This letter is in reference to open burning being permitted by you at the South Dayton Landfill, 2055 Springboro Road.

Open burning without written or verbal permission from our agency is prohibited. The open burnings are in violation of Section 124.01 of the Montgomery County Combined General Health District Air Pollution Control Regulations; also, these fires are in violation of Ohio Regulation, Ohio Administrative Code 3745-19-03 of the Ohio Environmental Protection Agency.

You are hereby ordered to cease all open burning in violation of Section 124.01 of the Montgomery County Combined General Health District Air Pollution Control Regulations and of OAC 3745-19-03 of the Ohio Environmental Protection Agency. Any further violations of these regulations may result in legal action.

In reference to the air curtain destructor located at this location, there has not been a permit issued for its operation.

If you have any questions concerning this matter, feel free to call me at 225-5922.

Sincerely,

Thurman D. Smith
Air Pollution Control Specialist

OFFICIAL ORDER

Dear Mr. Grillot:

On January 3, 1990, Tom Hut and Tracy Graef of the Combined Health District of Montgomery County conducted an inspection of your demolition disposal site located at 1975 Dryden Road.

Our inspection revealed an area near the front of the fill on which fly ash is being dumped. Demolition debris was also observed, however, there was no evidence of any solid waste on the site. Although you were previously given authorization for disposal of demolition material at your site, recent changes in the solid waste disposal regulations will require you to obtain new approval from Ohio EPA. Ohio Administrative Code (OAC) 3745-27-13(A) states that, "No person shall, without prior authorization from the Director, engage in filling, grading, excavating, building, drilling, or mining on land where a hazardous waste facility or solid waste facility was operated. As a previously licensed solid waste disposal facility, this rule applies to your site. A copy of this rule is enclosed for your information.

Until such time that authorization from the Director of Ohio EPA is granted for the disposal of exempted solid waste material, you are hereby ordered to immediately cease accepting any waste for disposal at this site. In order to continue your practice of disposing demolition debris and fly ash at this site, the requirements set forth in OAC Section 3745-27-13(C) must be met.

Failure to comply with this order may result in further legal action taken against you. Failure to provide the required information to the Director within thirty (30) days will result in the assumption that this site is permanently closed and must meet all closure requirements set forth in OAC 3745-27-10.

Dear Mr. Grillot:

On March 29, 1990, Mr. J. R. Rao from Delco Moraine contacted this office requesting an extension on the disposal of fly ash at your site.

After discussing this issue at length with Mr. Rao, it was agreed that Delco may continue to dispose of fly ash at your facility until April 30, 1990.

If you have any questions concerning this matter, please contact this office at 225-5917.

Sincerely,

Tracy L. Graef, R.S.

Mr. Alcine Grillot
2708 Kreitzer Road
Moraine, Ohio 45439

Dear Sir:

A routine inspection of the South Dayton Dump was conducted on October 12, 1990 by Tracy Graef of the Montgomery County Combined Health District.

It appears that some cleanup has taken place at the site, particularly in the area behind the piles of fly ash and the front pallet storage area. This is what the entire site should look like when the cleanup is complete.

The next area requiring attention is the pallet area farther back in the site. The trash and paper must be cleaned up, then the pallets should be stacked as they are in the other area.

You should continue working on cleaning up the miscellaneous items such as the barrels which contain metal turnings, the flattened empty barrels, etc. The remainder of the items can be further consolidated and eventually hauled away.

You have made some improvements at the site and I would like for you to continue your work. I will be checking the site periodically to monitor your progress.

If you have any questions, please contact me at 225-5917.

Sincerely,

Tracy L. Graef, R.S.

SOUTHWEST DISTRICT

January 31, 1991

Mr. Alcine Grillot
2708 Kreitzer Road
Moraine, Ohio 45439

Dear Sir:

A routine inspection of the South Dayton Landfill located at 1975 Dryden Road was conducted on January 30, 1991.

The site has basically remained unchanged over the past several months. It was noted that concrete is being dumped along the south side of the site. This is acceptable, as is other hardfill material such as stone, brick, and block. However, asphalt is not acceptable in this area due to the water. Blacktop material is to be disposed of in dry areas only.

The front pallet area was found to be clean and somewhat organized. The west pallet area was deplorable. There is a sizeable quantity of paper and other trash strewn throughout this area. This area must be cleaned up and organized as the other area has been. This needs to be done as soon as possible.

As previously requested, the material lying around the site needs to be consolidated to facilitate recycling activities and cleanup.

Routine inspections will be conducted to monitor compliance. If you have any questions, please contact me at 225-5917.

Sincerely,

Tracy L. Graef, R.S.
